PROJECT :

Name :

DETECTION OF E PHISHING WEBSITES USING MACHINE LEARNING

Description :

This is useful to detect the phishing website in web, phishing is a common attack on credulous people by making them to disclose their unique information using counterfeit websites. The objective of phishing website URLs is to purioin the personal information like user name, password and online banking transactions. Phishing use the websites which are visually and semantically similar to those real websites. As technology continues to grow, phishing techniques started to progress rapidly and this needs to be prevented by using anti-phishing mechanisms to detect phishing. Machine learning is a powerful tool used to strive against phishing attacks.
